

RAS 63

SCRAPER TOOL d20 – 63 mm (SDR 7,4 – 11 – 17 – 17,6)

The new essential mechanical scraper for removing the surface layer from pipes, fittings and joining rings used for electrofusion welding. The special strong and firm construction needs of an insert reducer set for different diameters and SDR (dimensional parameter equal to the rate of the outer diameter and thickness) simple to change with a handwheel.

The particular used blade, gives the user the possibility of a double kind of cutting; if necessary the user can simply unscrew the blade, turn it and then screw it again in the second position to go on with the work.

Box dimensions	Gross weight	Net weight
 A 140 mm B 480 mm C 380 mm	Kg 4,80	Kg 1,50
