

RAS 400

SCRAPER TOOL d200 – 400 mm

The new essential mechanical scraper for removing the surface layer from pipes and fittings used for electrofusion welding. The special strong and firm construction doesn't need of insert reducers for working with different diameters or additional attachments: simply using the clamping handhold, the user has a stable and reliable hold of the ASE 400 in eight points into the working pipe wall.

The particular used blade, gives the user the possibility of a double kind of cutting; if necessary the user can simply unscrew the blade, turn it and then screw it again in the second position to go on with the work.

Box dimensions	Gross weight	Net weight
 A 140 mm B 480 mm C 380 mm	Kg 8,50	Kg 6,30
